Introduction

Name: **HZ-1208 Crib side percussion testing machine**

Alibaba Top 10 Global E-Business in Testing Machine

BV/ISO

Equipment Summary:

During use crib side testing machine simulation crib percussion, its resistance to repeated impact performance. The main framework for machine uses about 50 * 40mm aluminum production, the floor using 10mm thick steel plate, the surface paint wrinkle treatment, beautiful and generous. Durable. All pneumatic components, electrical components, all imported components.

Corresponding Standard:

During use crib side testing machine according with GB ,EN standard

Applicable Industry:

During use crib side testing machine, It is ideal testing instrument for pram manufacturers, research and product quality supervision and inspection industries and sectors.

DONG GUAN LIXIAN INSTRUMENT SCIENTIFIC CO.,LTD

Technical Parameters:

Model	HZ-1208 Crib side percussion testing machine
Impact angle	60 degree or 90 degree
Impact mode	The impact of the free swing
Impact speed	5 time/min—20 time/min adjustable
Impact times	0-9999 times (Times can be set),When happen abnormal situation it automatically stops shocking and counting
Impact pendulum weight	2KG
Radius of turn	300MM
Volume	1200*800*1800mm(excluding the control box)
Weight	170KG
Notes	Testing machine should be able to impact on 850MM anywhere of wide bed
